

Release Agent

Description

This oil-based product is applicable for various types of metal, wooden, plastic, and fiberglass mold. As this release agent is not water-based it doesn't result in mold rust. This oil, by making a thin layer between the concrete and mold, makes the detachment of concrete from mold easy. It has no negative effect on concrete and mold. After opening the mold, the release agent removes quickly. The materials used in this product, due to having oil and soap in their content, make the concrete detachment from mold easier.

Advantages

- Easy detachment of the concrete from its mold without the need to mechanical hitting
- Timesaving and economical
- Smoothing the surface of the concrete
- Enduring the molds for having less depreciation
- No color change

Dosage

It depends on the type and surface of the mold. In smooth metal containers, each liter of this agent can cover 6 up to 8 square meter.

How to use

First clean and dry the surface of the mold. Then, rub the agent on the surface using a brush.

Specifications

Appearance: liquid

Solvent: gas oil

Density: 0.84 ± 0.02

PH: 6 ± 0.5

Shelf time:

1 year after production

Packaging and maintenance

Keep in 20 gallons or 220-liter barrels. Keep in a covered area out of sunlight

Safety points

This is a flammable agent. Safety cares must be taken into account to prevent fire.
